

Eduardo Carvalho

Software Engineer | Full Stack Developer (Java & PHP)

+55 41-9744-3696 | edu.ascarvalho@gmail.com | Curitiba, PR | linkedin.com/in/edu-carvalho-dev/

PROFESSIONAL OVERVIEW

Software Engineer with 8 years of experience in software development, building and maintaining enterprise applications across Java and PHP ecosystems. Experienced in backend development with Java, Spring Boot, PHP, REST APIs, SQL Server, MySQL, Docker, Kafka/EventHub, Azure Cloud, and modern frontend technologies including React and Vue.js.

Strong background in system integrations, business-critical applications, performance optimization, and full software lifecycle ownership. Proven ability to develop scalable solutions, troubleshoot complex production issues, and deliver reliable software in agile environments.

WORK EXPERIENCE

SOFTWARE ENGINEER | Grupo Marista (PUCPR)

JUL 2024 – PRESENT

- Own and maintain enterprise-grade applications used for academic and teacher management processes across the organization.
- Develop backend solutions using Java 11/17, Spring Boot, SQL Server, Kafka/EventHub, and Azure Cloud services.
- Build and maintain REST APIs, business workflows, integrations, and data processing solutions supporting thousands of users.
- Develop and maintain frontend features using React and TypeScript.
- Participate in architecture discussions, incident resolution, performance optimization, and production support activities.
- Design and implement new features while ensuring code quality, scalability, and maintainability.

SOFTWARE ENGINEER | Econet

DEC 2022 – FEB 2024

- Developed and maintained business-critical applications using PHP, MySQL, Docker, JavaScript, and Vue.js.
- Designed and implemented new system features, integrations, and process automation solutions.
- Built performance optimization mechanisms including caching strategies that significantly reduced database load for high-volume operations.
- Maintained and enhanced legacy systems while ensuring platform stability and reliability.

SOFTWARE ENGINEER | VHSYS

JUL 2021 – JUL 2022

- Developed and maintained ERP platform features using PHP and MySQL.
- Implemented frontend solutions using React, TypeScript, and Vue.js.
- Participated in bug fixing, system enhancements, and continuous platform improvements.
- Worked daily with Docker-based development environments and database optimization activities.

Eduardo Carvalho

SOFTWARE ENGINEER | Chaves na Mão

JAN 2021 – JUN 2022

- Developed CRM and lead management solutions used by sales teams to centralize customer interactions and sales activities.
- Implemented scheduling, follow-up tracking, and customer relationship workflows.
- Built backend features using PHP and MySQL.

EDUCATION

Bachelor's Degree in Information Systems
UNIFESP – Brazil
2019

Postgraduate Specialization in Java Development (In Progress)
UTFPR – Federal University of Technology Paraná
Expected Completion: 2026

SKILLS

Languages:

Java, PHP, JavaScript, TypeScript

Backend:

Spring Boot, Spring Data JPA, Hibernate, REST APIs, Microservices

Frontend:

React, Vue.js, HTML5, CSS3

Databases:

SQL Server, MySQL

Cloud & DevOps:

Azure, Docker, Azure Functions, CI/CD

Messaging:

Kafka, Azure EventHub

Tools:

Git, Maven, Gradle, Linux

Methodologies:

Agile, Scrum, Software Architecture, Debugging, Problem Solving

Eduardo Carvalho

LANGUAGES

Portuguese: Native

English: Intermediate (B2)

SELECTED PROJECTS

Teacher Management Platform (PUCPR)

Java 11/17/21, Spring Boot, React, SQL Server, Azure, Kafka

Develop and maintain enterprise-grade academic management solutions supporting teacher scheduling, attendance tracking, approval workflows, notifications, and faculty operations.

Design and implement backend services, business rules, and REST APIs using Java and Spring Boot, ensuring scalability, maintainability, and high availability.

Build integrations with internal and external systems through asynchronous event processing and cloud-based services.

Notification Optimization Platform (PUCPR)

Java 17, Azure EventHub, Azure Functions, Node.js

Developed an event-driven notification solution that decoupled notification generation from teacher import processes.

Leveraged Azure EventHub and Azure Functions to process notifications asynchronously, reducing database contention and improving overall system scalability.

Corporate Information Portal (Econet)

PHP, MySQL, Vue.js, JavaScript, Docker

Designed and developed a large-scale business information portal serving more than 40,000 active users.

Integrated multiple internal and external data sources to provide real-time access to regulatory, legal, tax, and business information.

Implemented intelligent caching and query optimization strategies that significantly reduced database load and improved response times for frequently accessed content.

Owned the full software lifecycle, including architecture, development, deployment, maintenance, and continuous enhancements.
